[↳\[SBT-28\] ET : System does not display "\\$" sign in withdrawal option 3](#)

Created: 29/Jan/26 Updated: 30/Jan/26 Resolved: 30/Jan/26

Status:	Bugs
Project:	SENG637-Bug-Tracker
Components:	None
Affects versions:	ATM V1.1
Fix versions:	None
Parent:	Transactions Test

Type:	Bug	Priority:	Low
Reporter:	Maheen Hoque	Assignee:	Dipu Khan
Resolution:	IN-PROGRESS	Votes:	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		
Environment:	<ul style="list-style-type: none"> OS: Windows 10 Java Version: JDK 17.0.15.6 ATM System: Version 1.1 		

Description

Function Being Tested:

System displays a menu of possible withdrawal amounts

Initial State of System:

- System is powered on with \$500 initial cash (25 bills of \$20)
- Account balances: Checking: \$100, Savings: \$1,000, Money Market: \$5,000
- Card 2 inserted and PIN 1234 entered successfully (Can be reproduced with any card)

Steps to Reproduce:

- Start from initial state
- User chooses "Withdrawal" transaction type
- User chooses any valid account to withdraw from

Expected Outcome:

System shows a list of possible withdraw amount each starting with a \$ (dollar) sign

Actual Outcome:

3rd option of possible withdraw amount does not start with a \$ (dollar) sign

Justification for Severity:

This can be classified as an UI bug. This does not disrupt any core user functionality.

Inquiry Test (SBT-8)

↳ [SBT-27] **MFT : The system doesn't accept the correct PIN after 2 wrong PIN entries.** Created: 26/Jan/26 Updated: 30/Jan/26 Resolved: 30/Jan/26

Description

Function Being Tested: Correct re-entry on the third try is accepted

Initial State of System:

- System is powered on with \$500 initial cash (25 bills of \$20)
- Account balances: Checking: \$100, Savings: \$1,000, Money Market: \$5,000
- Card 2 inserted and wrong PIN 12 entered
- wrong PIN 2 entered

Steps to Reproduce:

1. Power on the ATM system and enter 25 for initial cash amount
2. Click "Click to insert card" button
3. Enter card number: 2
4. Enter PIN: 12 using the keypad
5. Re Enter PIN: 2 using the keypad
6. Re Enter PIN: 1234 using the keypad

7. Observe the ATM Display

Expected Outcome:

The ATM should accept the PIN and display different Transaction .

Actual Outcome: The ATM display to enter PIN again.

Description

Function Being Tested:

System performs a legitimate transfer transaction properly

Initial State of System:

- System is powered on with \$500 initial cash (25 bills of \$20)
- Account balances: Checking: \$100, Savings: \$1,000, Money Market: \$5,000
- Card 1 inserted and PIN 42 entered successfully
- User chooses "Transfer" transaction type
- User chooses "Checking" as transfer from account and then chooses "Savings" as transfer to account
- System is displaying a request for the user to type a dollar amount

Steps to Reproduce:

1. Power on the ATM system and enter 25 for initial cash amount
2. Click "Click to insert card" button
3. Enter card number: 1
4. Enter PIN: 42 using the keypad
5. Press 3 to select "Transfer" transaction
6. Press 1 to select "Checking" as the transfer source

7. Press 2 to select "Savings" as the transfer destination
8. Enter "100.00" as amount to transfer and press "Enter"

Expected Outcome:

The printed receipt should display:
TRANSFER FROM: CHKG TO: SVGS
AMOUNT: \$100.00
TOTAL BAL: \$1100.00
AVAILABLE: \$1100.00

The log should show:

Message: TRANSFER CARD# 1 TRANS# 1 FROM 0 TO 1 \$100.00

Response: SUCCESS

Actual Outcome:

The printed receipt shows:
TRANSFER FROM: SVGS TO: CHKG (from and to must be correctly mentioned)
AMOUNT: \$99.50
TOTAL BAL: \$1099.50
AVAILABLE: \$1099.50

Comments

Comment by [Jasdeep Singh](#) [28/Jan/26]

Defect still exists in version 1.1

Now the transfer amount is correct, but the receipt still shows the wrong "from" and "to" accounts

Description

Function Being Tested:

System validates envelope insertion

Initial State of System:

- System is powered on with \$500 initial cash (25 bills of \$20)
- Account balances: Checking: \$100, Savings: \$1,000, Money Market: \$5,000
- Card 2 inserted and PIN 1234 entered successfully
- User chooses "Deposit" transaction type
- User chooses "Money Market" to deposit
- User enters "100.00" amount and clicks "Click to insert envelope"

Steps to Reproduce:

1. Power on the ATM system and enter 25 for initial cash amount
2. Click "Click to insert card" button
3. Enter card number: 2
4. Enter PIN: 1234 using the keypad
5. Press 2 to select "Deposit" transaction
6. Press 3 to select "Money Market" as the destination source
7. Enter "100.00" amount using the simulated keypad to deposit

8. Click "Click to insert envelope"
9. Observe the receipt that is printed

Expected Outcome:

DEPOSIT TO: MMKT
AMOUNT: \$100.00
TOTAL BAL: \$5100.00
AVAILABLE: \$5000.00

Actual Outcome:

DEPOSIT TO: MMKT
AMOUNT: \$100.00
TOTAL BAL: \$5090.00
AVAILABLE: \$5000.00

Justification for Severity:

This is an issue with the core functionality. The ATM machine fails to acknowledge the deposit of \$100. It only shows \$90.

Comments

Comment by [Jasdeep Singh](#) [28/Jan/26]

Defect still exists in version 1.1

However, the difference in amount is now only 10 cents.

Issue links:	Relates			
	relates to	SBT-17	ET: System returns wrong amount in wi...	Fixed in V1.1

Description

Function Being Tested:

Withdrawal from valid accounts

Initial State of System:

- System is initialized with \$2000 (100*20 bill) and a card is inserted (1 or 2)
- System is displaying the menu of withdrawal amounts for inserted card

Steps to Reproduce:

- Select any valid account type for the given card

2. Select any valid withdraw amount, within the bounds of account balance and amount available in the ATM (in this case, for checking account, up to \$100 - options 1, 2, 3, or 4. For savings account, up to \$400 - options 1, 2, 3, 4, or 5).

Expected Outcome:

The system should:

- System dispenses this amount of cash
- System prints a correct receipt showing amount and correct updated balance
- System records transaction correctly in the log

Actual Outcome:

- The system withdraws a completely different amount (Note: if \$20 is selected, \$40 gets withdrawn. If \$40 is selected, \$60 gets withdrawn and so on. The issue seems like a mapping error between the options and the amount)
- System incorrectly identifies the card as another card
- System prints a receipt showing the amount and updated balance which takes the incorrect amount into consideration

Justification for Severity:

This hinders a core function of the ATM system, making it incapable of doing accurate withdrawal. System also records the transaction under a wrong card number, which leaves no proof of error for the cardholder. Hence, it has the highest severity.

Environment:	<ul style="list-style-type: none"> • OS: Windows 10 • Java Version: JDK 17.0.15.6 • ATM System: Version 1.0 		

Description

Function Being Tested:

Card number validation

Initial State of System:

- System is powered on with \$2000 initial cash (100 bills of \$20)

Steps to Reproduce:

1. Start from the initial state
2. Enter card
3. Enter incorrect card number (example: 0000 or 9999)

Expected Outcome:

The system should immediately reject the card showing “invalid card number”

Actual Outcome:

The system:

- Transitions into the state of prompting for PIN number entry.

(Note: After entering the PIN number, whether correct or incorrect, the system then rejects the card, not before.)

Justification for Severity:

This does not hinder any critical function. However, it can cause confusion for the user and costs an unnecessary step in the user flow, when it could have been a much simpler interaction. Hence, medium.

- System is powered on with \$2000 initial cash (100 bills of \$20)

Steps to Reproduce:

1. Start from the initial state
2. Enter Card
3. Enter Card Number (1)
4. Enter invalid card PIN twice (example: 0000 or 9999)
5. Enter the correct PIN number (42)

Expected Outcome:

The system should:

- Accept the PIN number and lead to the operations menu, displaying the transaction options

Actual Outcome:

The system prompts the user again to enter PIN number

(Note: After that prompt, if correct PIN number is entered, the system transitions to the operations menu)

Justification for Severity:

This does not hinder any critical function, however, it can potentially cause confusion for the user, hence, medium.

Original estimate:	Not Specified		
Environment:	<ul style="list-style-type: none"> • OS: Windows 10 • Java Version: JDK 17.0.15.6 • ATM System: Version 1.0 		

Description

Function Being Tested:

System startup and shutdown - logging event

Initial State of System:

- System is powered on with \$2000 initial cash (100 bills of \$20)

Steps to Reproduce:

1. Start from the initial state
2. Click on the “OFF“ button
3. Click on the “Show Log“ button
4. View the logs

Expected Outcome:

The logs should display:

- System shutdown event with date-time

Actual Outcome:

The logs shows nothing

(Note: The logging event may not be properly captured)

Justification for Severity:

This does not hinder any critical function, neither does it cause problems for users. Hence it is deemed low.
